

# BRAIN TALENT PROFILE

For **James Sample (#3)**

Date: **Sample**

Like a smart phone app, a “Brain App” is a tool for your brain. These “apps” let you perform important processes using cognitive + emotional data to achieve results. These learned capabilities help people be effective at work and in life.

## Your Top Brain Talents in Order

### Design

This App enables long-term vision to be blended with accurately seeing the current reality.

### Critical Thinking

With this App, brains are apt to make better decisions by evaluating pros and cons for now and the future.

### Reflection

Brains with this App are likely to assess risks and evaluate before jumping into action.

### Collaboration

This App includes the capability to connect, work with others to manage and build shared understanding.

### Emotional Insight

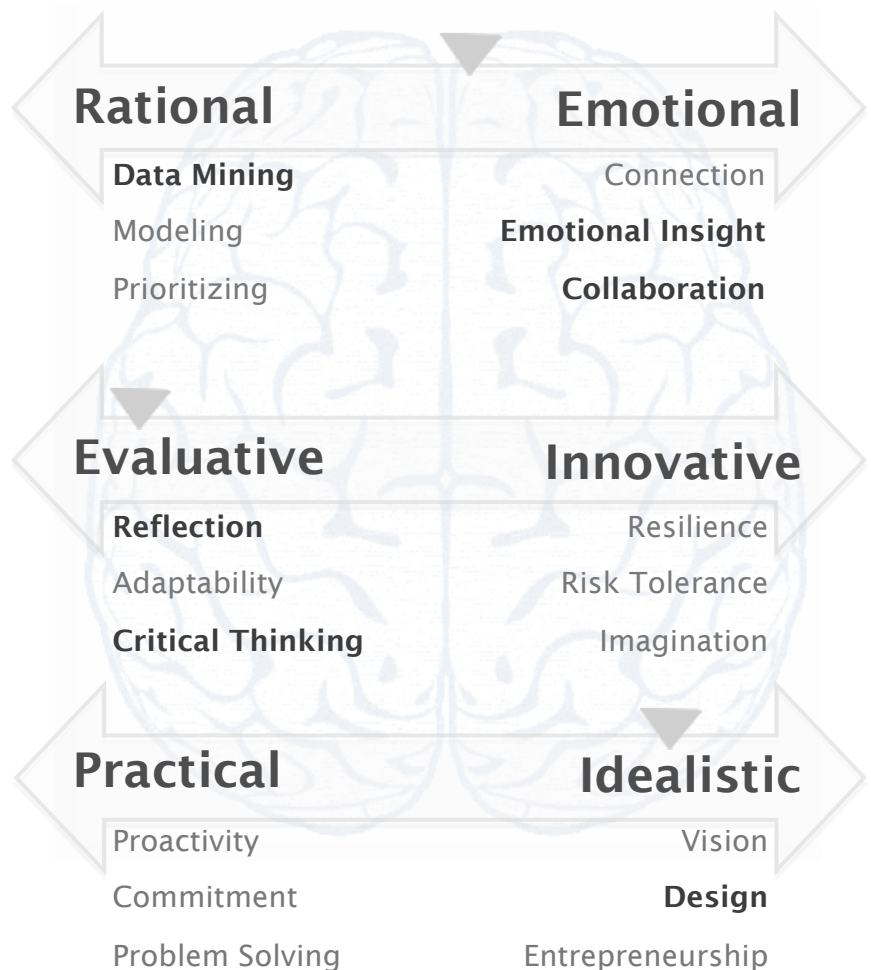

Brains with App are likely to understand people and predict human needs and dynamics.

### Data Mining

Brains with this App can observe accurately, noticing details and how they fit.

The 18 “Brain Apps” – your top 6 are highlighted:
